

Side-Bar™

Risk management air bolsters

Side-Bar risk management Air Bolsters from Med-Essentials are a bilateral side bolster solution which can be inflated or deflated easily as part of your facilities entrapment / risk management program. Available as standard on all Med-Essentials powered support systems, Side-Bar's promote maximum independence and safety by allowing you to decide when your patients really need them.

Easy to inflate

Side-Bar's are always ready. Simply turn the tubeset valve for instant inflation

Transfer Friendly

Deflate Side-Bars for unintrusive storage and ease of assisted transfer, or when bolsters are not required

Safety first

Side-Bars contoured design allows independent ease of ingress / egress, while providing reassurance, comfort and patient compliance
